Cenotes

The adventure takes place in four different kinds of cenotes protected by aluxes where you will be able to practice different activities such as Kayak, Zip-lines, Inner Tubes, Rappel and Snorkel.

K'áak ´: It is an open cenote that allows underground currents to communicate with the jungle and light. Paddle a kayak surrounded by lush jungle and have fun as never before

Ha': It is a cavern cenote, home to beautiful aquatic fauna and where you will find beautiful rock formations. A stunningly beautiful setting where you can dive in and discover wonderful underwater gardens

Lu'um: It is a semi-open cenote. It connects to the aquifer through tunnels and caves. The flow of water is horizontal. The cenote is still semi-closed, thus it is considered young. Rappel to adventure and take a dip in the clear waters of Cenote Earth

lik': It is an advanced age cenote known as ancient cenote. This type of cenote is blocked from the water table due to the collapsed roof or walls and sediments. Feel the breeze on your face as you slide through zip lines over the enigmatic jungle .

Important: Children ages 7 and older.
